*80gsm bond paper

Affordable and versatile, saddle stitching machine is an asset to your small print shop. The StitchMaster is a high-performance machine that comes in single and or double-headed models.

Both options can be attached to the optional stand or clamped onto any work table. The optional stand adjusts from 28" to 42" in height to allow for easy foot pedal operation without taking up table space. It also has a convenient one-knob adjustment that provides accurate and simple adjustment from the thinnest to the thickest layers. The StitchMaster is designed to work with the most common stitch wire, 25 gauge round stitching wire,

It has two pop-up pins for perfectly placed corner staples, as well as the ability to saddle stitch and flat-stitch.

Its side stops adjust from 2 1/2" to 26" wide, allowing for perfectly aligned stitches on a variety of sheet sizes. With a capacity of max. 60 sheets of bond 80gsm copy paper and the ability to handle booklets up to 6mm thick, you can quickly and easily achieve the most common booklet thicknesses.
