6 Bin Collator suitable for NCR Paper

Carbonless Paper System

Professional Post-Press
Equipment Manufacturer

► System Feature

- **Low Cost**
6-bin collator can sort carbonless paper with low purchasing cost.
- **Automatically Align Sorted Paper**
Connect jogger to align sorted paper for reducing production process.
- **Receive Paper Backward and Forward**
Paper can be ejected to the back jogger or to the front stacker to receive numbering carbonless paper in order.
- **Flexible Classification**
Besides insert, to the convenience of dividing every pile of paper manually, machine can stop and wait according to the number of sets of paper set by operator.
- **Alternate Bins**
Divide 6 bins into 2 groups, to achieve continuous production the group 2 starts to sort paper when group 1 is running out of paper.

► Collator Feature

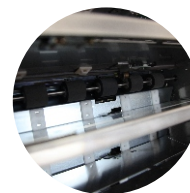

Simple Operation

Operation on touch screen, 10 minutes to learn all of operations.

High Efficiency

Maximum 3500 sets/h, equivalent to 3 workers who manually sort paper.

Accurate Detection

To prevent from wrong sorted paper, machine stops and alarms when double feed, feed failure, paper jam and out of paper occurs.

► System Specification

Paper Size	MAX(L×W): 450×330mm
	MINI(L×W): 120×120mm
Paper Thickness	45-150gsm
Speed	3500 sets/h
Capacity of Jogger	100mm
Error Display	double feed, feed failure, jam, out of paper
