

Rollem Champion

The most profitable and accurate way to perf,
score, slit and semi-slit.

Rollem

Fast and furious.
Perf, rotary score, slit
& semi-slit at up to
15,000 sheets/hour.

At Rollem we think our Champion is a true winner and we want you to think of it as your conquering hero for profitability.

The Rollem Champion

The Champion sets the standards by which others are judged.

Imitated but never duplicated, it perms precisely, scores at super speed and slits superlatively - but with over 72 years of engineering experience that's exactly what you'd expect from a Rollem bindery machine. Pure Quality.

It out performs every finishing machine in its class for registration, speed, quality and economy - all this, and without the use of highly skilled technicians.

Fast and Furious

Running at unrivalled speed, it can precision perf, score or slit with razor sharp accuracy at up to 15,000 sheets per hour.

And this one machine can perform 23 styles of perf, 14 styles of scoring and precision slitting - making it the undisputed leader.

No excess wear on moving parts and no more alignment problems as the Champion is set on an indestructible base.

Superior engineered parts and critical adjustments are now perfectly rigid - we've even banished annoying vibration and bounce.

Get the strength
of Rollem's
Champion on
your team.

Unchallenged in its class for speed, registration, quality and economy

Easy to Use

Advanced but simple, you don't need a pressman to operate the Champion. Set ups take minutes - you'll be performing up to 1050mm of limitless perf and score lines in no time.

Profits

Our machines are built to last, there's virtually no maintenance which means no down time for you and no subsequent loss of profits! You can even salvage 'off register' jobs (saving money in reprints) because the Champion compensates for registration and stock imperfections. With the Champion, results are perfect, concise and consistent every time.

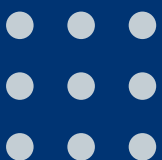

Limitless capabilities

The Champion will perf, score, or slit any type of stock; from 45 gsm stock to a 750 micron board. From tissue paper to a credit card - traditionally printed to digitally printed stock - even open-end NCR sets glide through with ease. No problem!

Start with a Rollem and finish like a Champion. Nobody else comes close.

Champion for the perfect finish
